

Create security group

A security group acts as a virtual firewall for your instance to control inbound and outbound traffic. To create a new security group, complete the fields below.

Basic details

Security group name

Name cannot be edited after creation.

Description

VPC

vpc-094bbe61ef3ff436 (Touch and Die)

Inbound rules

Type	Protocol	Port range	Source	Description - optional
Custom TCP	TCP	0	Anywhere...	HTTP
			0.0.0.0/0	
SSH	TCP	22	Anywhere...	SSH
			0.0.0.0/0	

Add rule

Rules with source of 0.0.0.0/0 or ::/0 allow all IP addresses to access your instance. We recommend setting security group rules to allow access from known IP addresses only.

Type	Protocol	Port range	Source	Description - optional
SSH	TCP	22	Anywhere...	SSH
			0.0.0.0/0	

Add rule

Rules with source of 0.0.0.0/0 or ::/0 allow all IP addresses to access your instance. We recommend setting security group rules to allow access from known IP addresses only.

Outbound rules

Type	Protocol	Port range	Destination	Description - optional
All traffic	All	All	Custom	
			0.0.0.0/0	

Add rule

Rules with destination of 0.0.0.0/0 or ::/0 allow your instances to send traffic to any IPv4 or IPv6 address. We recommend setting security group rules to be more restrictive and to only allow traffic to specific known IP addresses.

Tags - optional

A tag is a label that you assign to an AWS resource. Each tag consists of a key and an optional value. You can use tags to search and filter your resources or track your AWS costs.

Key	Value - optional
Name	catchupmonday

Add new tag

You can add up to 49 more tags
